

CompleteView™ - The Benefits at a Glance

CompleteView™ offers an exceptionally simple and powerful interface with your data, underpinned by NewField IT's considerable heritage and understanding of MPS, that delivers real meaning and value. This addresses three key areas:

- Office printing represents a significant overhead to most organisations and is typically an uncontrolled expense with significant environmental impact.
- The rapid growth of data availability in the MPS market is paradoxically making it more and more difficult for MPS customers and suppliers to truly understand their environments and opportunities.
- Additionally, when providing or acquiring a service, rather than a product, the presentation of data is essential to prove the value of the solution.

Functionality	Benefits	Finance	People	Green
Highlights poor results	Reduce print volume and/or devices	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Active monitoring of the data	Optimise the number of devices	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Consolidate disparate data sources	Easy to manage multiple suppliers, with a single dashboard	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Simple online collaboration	Colleagues and customers can explore findings remotely	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
High levels of data security	The right people see the right data at the right time	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Web-based delivery	Removes the need for 'weighty' reports	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Intuitive presentation	Allows for rapid, accurate, decision making	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Predictable, repeatable, accurate complex calculations	Users spend less time, and get the right answer	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

CompleteView™ - Technical Requirements

All you need for CompleteView™ is

- An internet connection
- Any web browser
- Data, from any source. Databases, csv, Excel, even web pages

CompleteView™ Business Intelligence at a Glance

CompleteView™ - See the wood from the trees and stand out from the crowd

NewField IT's web-based software application that provides interactive dashboards for companies to understand their office printing like never before. Applying business intelligence methodologies to the print environment offers intuitive understanding with a few mouse clicks.

Powerful Visualisation

Intelligent presentation of the data makes it easy to understand. You don't need to be an analyst to use the tool, putting the power to make decisions into the right hands.

Accurate every time

Whilst it's easy to agree on a course of action, it can sometimes be difficult to prove that it's been achieved. CompleteView presents information clearly and simply to remove any doubt.

Scenario Analysis

An intuitive interface allows you to understand 'What if'. By adjusting variables, it's easy to see the effect that they might have in reality, and allow you to build a business case for change

CompleteView™ provides:

- **Understanding**
Which parts of the fleet cost more - allowing you to take targeted action.
- **Modelling**
How new policies can affect costs
- **Visualisation**
Instantly identify unusual activity or device data, and trends.

Older devices tend to be:

- more expensive
- worse for the environment
- less reliable
- and have fewer features

Networking devices offer greater resilience and facilitate monitoring.

A wide variety of device types will pose issues for:

- users seeking to use any advanced functions
- those that are ordering consumables
- those who support the fleet.

Underutilised devices represent wasted money. Over-utilised devices can lead to service issues.

Small changes in colour usage can mean a big change in costs.
